

Laboratory Technician

Location: St. Louis, Missouri (On-site)

Company: Varro Life Sciences

Who We Are:

Join us in our mission to bring to market game-changing technology for the real-time detection of pathogens. At Varro Life Sciences, we're developing devices to detect pathogens from breath and indoor air. Our products combine ease of use, cost efficiency, and performance to provide critical information to protect human health.

At Varro, you will help redesign the future of life sciences through technology. Motivated by the idea that our products will save lives and create a safer world, we aim to solve real-world problems and maximize global impact.

What We Live By:

- **Data-Driven Decisions:** We search for the best solutions, backed by data, and optimize for speed, simplicity, and scale.
- **Support Each Other:** We celebrate the ideas and contributions of our teammates. Success is a team effort, and everyone deserves to feel heard and valued.
- **Simplify:** We build intuitive solutions to create clear, meaningful results that positively impact public health.

Job Overview

We are seeking an experienced laboratory technician to assist the development of Varro's next generation pathogen detection platform. This role is critical to our success and offers the opportunity to work in a fast paced start up ecosystem for a cause that impacts public health globally.

Key Responsibilities

- Perform general upkeep of the laboratory and equipment.
- Assist in performing analytical studies and testing routinely performed in the laboratory and in studies as required.
- Perform data entry and maintain data files and other required records on research.
- Prepares reagents, test materials etc., and maintain inventory records
- Prepares and maintains required documentation on laboratory and target/analyte conditions related to biosensor testing work.
- Analyzes, interprets, and presents experimental data.
- Perform miscellaneous duties as assigned.

Qualifications and Skills

Required Qualifications:

- B.S in Analytical Chemistry or Molecular Biology or equivalent combination of education and experience

Preferred Qualifications:

- M.S in Analytical Chemistry with a fundamental understanding of electrochemistry.
- The ideal candidate will have up to 2 years of experience in an academic lab or start-up.
- Experience in an FDA-regulated environment and within an ISO13485 system is preferred.

Skills:

- Biological Sciences, Analytical Chemistry, Interpersonal Communication, Data Analysis and Presentation.

Physical Job Requirements:

The physical demands described within the responsibilities section of this job description are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations will be made to enable individuals with disabilities to perform these essential functions.

1. While performing the duties of this job, the employee is regularly required to be independently mobile.
2. Must be able and willing to lift 40 lbs

Location and Compensation

This is a full-time on-site position in St. Louis, Missouri.

Salary is based on qualifications and experience. Other benefits include:

- Medical, dental, and vision coverage.
- 401(k) plan
- Flexible PTO policy

You will have the opportunity to build revolutionary products that can save millions of lives!

Varro Life Sciences does not accept agency resumes.
